# Basic Needs of Children\*

---

All children have certain basic needs as well as needs that are specific to their age and stage of development. The basic needs of children are:

## Physical

- Food
- Warmth
- Shelter

## Mental

- Power—to make choices and follow plans

## Emotional

- A sense of belonging
- Expressions of unconditional love and acceptance

- Approval and recognition
- Freedom within defined boundaries
- Humor—a chance to laugh

## Spiritual

- An all-knowing, loving, caring God
- Forgiveness of wrongs and a chance to start over
- Assurance of acceptance with God
- Experience in prayer, answers to prayer
- A chance to grow in grace and in the knowledge of God

# The Kindergarten Child

---

In the Seventh-day Adventist Church we advocate kindergarten for children ages 3-5. However, the development of children varies from child to child. Therefore, a knowledge of each child in your Sabbath School is important. Generally, the description below is true of children ages 3-5.

## Physical

- Start developing large muscle coordination
- Lack a sure sense of balance
- Are extremely active
- Tire easily, but revive soon after resting
- Lack fine muscle coordination
- Are curious and like to explore their environment
- Learn by exploring

## Mental

- Are capable of limited listening and understanding without the help of a visual cue, such as seeing the object being discussed
- Have quick memory
- Memorize things they don't understand

## Emotional

- Cry easily
- Are capable of verbalizing emotional responses
- Learn to delay gratification of needs without losing equilibrium
- Learn ways to express negative emotions

## Social/Relational

- Are self-centered—the world revolves around them

- Play alone in the presence of their friends, rather than playing with their friends
- Like to make friends and be with friends

## Developmental Needs

In addition to the basic needs mentioned earlier, kindergarten children need:

- Freedom—to choose and to explore within limits
- Power—to have some autonomy in learning situations
- Limits—safe boundaries that are set by parents and teachers
- Fun—learning through play, enjoying success
- Discipline and training—to provide safety and structure in their lives

## Spiritual Needs

Kindergarten children need to know:

- God loves them and cares for them
- How to show respect for God
- God made them, knows them, and values them
- The difference between right and wrong
- How to choose the right with God's help

## General Rules

---

A child's attention span, in minutes, is their age plus one. Thus, an average 3-year-old has a potential attention span of four minutes, provided they are interested in what is happening.

### Kindergarten children:

- Enjoy repetition—provided they don't tire
- Are beginning to reason from simple cause to effect
- Make some generalizations—often incorrectly
- Learn best by active participation
- Have a short attention span—3 to 6 minutes

## To the Leaders/Teachers

These guides were developed to:

- A. Introduce the lesson on Sabbath.** The child then reviews and applies the principles studied with the help of their parents and Bible study guides during the week. In this way, the lessons learned in Sabbath School become a vital part of the child's growing faith experience. Memory verses, which are also learned in Sabbath School, are reviewed and reinforced during the following week, connected in the child's mind with the interesting learning activities they have already experienced.
- B. Focus the entire Sabbath School time on one message.** These messages each relate to one of the four dynamics of a growing faith experience: grace (God loves me), worship (I love God), community (we love each other), and service (God loves you too).

**C. Reach each child in the way they learn best.** By following the natural learning sequence on which these outlines were based, you will also connect students with “the message” for the week in a way that will capture each one’s attention and imagination.

**D. Give students active learning experiences** so they can more readily internalize the truths being presented. These experiences are followed by *debriefing* sessions in which you ask questions that lead the children to reflect on what they experienced, interpret the experience, and apply that information to their lives.

**E. Involve the adult Sabbath School staff** in new and flexible ways.

- A very small Sabbath School can be managed by one adult.
- A larger Sabbath School can be managed by one leader/teacher with other adult volunteers to facilitate the small group interaction. This gives small group facilitators a maximum involvement with the students and their dynamic learning, while requiring a minimum of preparation on the facilitator’s part.
- A creative alternative is to enlist leaders/teachers with different personal learning styles to lead different segments of the program.

(For more detailed information about the natural learning cycle, the learning styles, and other dynamics of teaching and learning, contact your Adventist Book Center or your Sabbath School or children’s ministries director.)

### **To use this guide . . .**

Try to follow the natural learning cycle outlined, but adapt it as necessary to make the program work in your particular situation.

Look ahead at the Program Outline for each week’s program so you can be prepared with the simple materials suggested.
